

Call for papers

Swedish Microwave Days

GigaHertz Symposium • AntennEMB Symposium
May 24-25 2018
Lund University

The Swedish Microwave Days will be arranged at LTH in Lund on May 24-25 2018. www.microwavedays.se

The Swedish Microwave Days is the premier Swedish event for research and technology within the field of microwave electronics and electromagnetics.

The aim is to bring together the leading researchers from academia, industry and research institutes active in the field of high frequency electronics and antennas, with a goal to facilitate interactions and information sharing.

The scope of the Symposium is broad, covering all fields of microwave and mm-wave technology:

- Device Technology
- Circuit and Systems
- Measurement Technology and Techniques
- Antenna Technology
- Computational Methods

The GigaHertz Symposium is a biennial symposium in the field of GigaHertz technology. This will be the 14th GigaHertz Symposium. The AntennEMB Symposium is the radio science symposium on Antennas and Computational Electromagnetics organized by SNRV. The AntennEMB Symposium has been organized on a regular basis for more than a decade.

Abstract Submission – Deadline February 28
Up to one page abstract including figures. Both *detailed technical*, as well as *overview* presentations are encouraged.

Abstract templates can be found on www.microwavedays.se.

Abstract Submission Deadline
February 28, 2018
